ABOUT ME

During my engineering studies at Warsaw University of Technology, I was a part of WUT Students' Council, where I got invaluable experience in student project planning and execution. Since graduation, I have worked in the field of waste management in the two largest waste management companies in Warsaw. My position required me to be precise, to pay attention to details and to meet deadlines.

Currently, I work as a manual software tester, where I am responsible for, among others: testing manual desktop applications, reporting errors, designing and creating scripts to automate testing in LUA and preparing test documentation.
